

COMPTECH[®]

WORLD CLASS COMPRESSOR

**OXY SERIES
COMPRESSORS**

**The Most Power Efficient Low Cost
Solution For Oxygen Generation**

- Forged Crank Shaft & Connecting Rod, Precision Main & Crank Pin Bearings.
- Two throw balance-opposed frame design to minimize unbalanced forces.
- Cast iron crosshead with replaceable aluminum shoes.
- Cylinders constructed with large cast in-water jackets & specially designed intercoolers for dimensional stability & better cooling under continues operation.
- All components constructed in accordance with international standards.
- Oxy-Comp are rugged units that offer exceptional value to our customers based on enhanced operating life, low maintenance & high efficiency for long life.

Balance Opposed Double Acting W
The Most Power Efficient Low Cos

LOWER OPERATING COST

Low power consumption is a key feature and makes a big difference in your electricity bill

LOWER MAINTENANCE COST

A rugged cast iron design ideal for heavy duty and continues 24x7 operating year after year.

Model Oxy-300

intercooled Four Stage Compressor.

Solution For Oxygen Generation

Technical Specification

Model	Motor HP	Oxygen Plant Capacity m ³	No of Stage	Compressor R.P.M.	Piston Displacement m ³ / Hr CFM		Working Pressure
Oxy-180	180	100	4	560	872	512	45Kg
Oxy-215	215	130	4	560	1187	698	45Kg
Oxy-270	270	170	4	670	1411	830	45Kg
Oxy-300	300	200	4	410	1635	962	45Kg
Oxy-400	400	300	4	550	2193	1290	45Kg

AFTER SALES TECHNICAL SUPPORT &
QUALITY SPARE PARTS
FOR YOUR

Peace of Mind

To ensure optimum compressor performance and reliability only one specification of spare part should be used : the original one. Comp-tech guarantee every part ordered.

Comprehensive stock holding means parts can be despatched immediately.

Convenient service packs and parts kits providing all the components necessary to carry out services and repairs are available.
